An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. James Neal on December 5, 2008.

The application has been amended as follows:

Claims 1, 2, and 5-9 have been canceled.

These claims were canceled so that claims 3 and 4 could be allowed.

The following is an examiner's statement of reasons for allowance:

Claims 3 and 4 are allowable. Claims 3 and 4 define over the art in that none of the art has two catheters in combination with the features of claim 1. The examiner notes that since both sensors of Alt are in the heart (vena cava and pulmonary artery), the examiner sees no motivation to add a second catheter and have more devices inside the heart.

In addition, the examiner notes that while claims 4 was rejected under double patenting, claim 3 was not. Since claim 4 depends on claim 3, the double patenting rejection on claim 4 was in error.

The examiner further notes that the calculating means in paragraph 4 clearly refers to means responsive ... for calculating in paragraph f of claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
